OBJECTIVE

Dedicated **Azure DevOps engineer** with over four years of hands-on experience in deploying robust and scalable SaaS applications. Skilled in managing back-end services, implementing effective automation frameworks, and proficient with CI/CD tools, SQL, and PowerShell scripting. Proven track record of delivering high-quality results through a proactive approach and strong problem-solving skills. Currently pursuing an Associate Degree in Computer Science from Mt. San Jacinto College, I am eager to apply my technical expertise and continuous learning mindset to drive efficiency and innovation within a forward-thinking technology company.

EDUCATION

Associate of Science (Computer Science). Mt. San Jacinto Community College	November 2024
Software Engineering Certificate. General Assembly (Remote)	December 2021

EXPERIENCE

Lightbeam Health | Azure DevOps Engineer 2023 - present

At Lightbeam Health Solutions, I worked as a full-time Azure DevOps Engineer, driving innovation in the population health software industry. My role involved deploying scalable SaaS web applications and backend services focusing on security and reliability. Utilizing my years of experience in DevOps automation frameworks, I developed automated processes to ensure delivery quality, security, and repeatability. My expertise in CI/CD tools, SQL, and PowerShell scripting enabled me to contribute effectively to an agile development team, collaborating with geographically disparate team members. Additionally, I assisted in troubleshooting software release issues and streamlined processes to reduce time to market.

Eagle Rose | DevOps Engineer 2020 - 2023

Spearheaded development of internal tools, collaborating with cross-functional teams to drive automation and improve overall efficiency. Expertly developed and maintained Google Workspace and Apps Script solutions to streamline client-facing processes. Led complete product lifecycle from conception to deployment, ensuring high-quality standards in a fast-paced environment. Proactively identified and resolved technical challenges, scaling infrastructure to meet evolving business needs. Assumed responsibility as a Google Workspace administrator, overseeing and maintaining technical processes within the company.
